

Forest vertebrates

1. Can you name some kinds of vertebrates?
2. Can you name some forest animals?
3. What forest animal do you like?
4. What forest animal likes honey?

A bear is a forest vertebrate. All bears have:

- a diet of meat and plants,
- long sharp claws,
- small eyes,
- large round heads,
- thick fur,
- a very good sense of smell.

Did you know?
There are only eight living species of bears.

Bear's anatomy

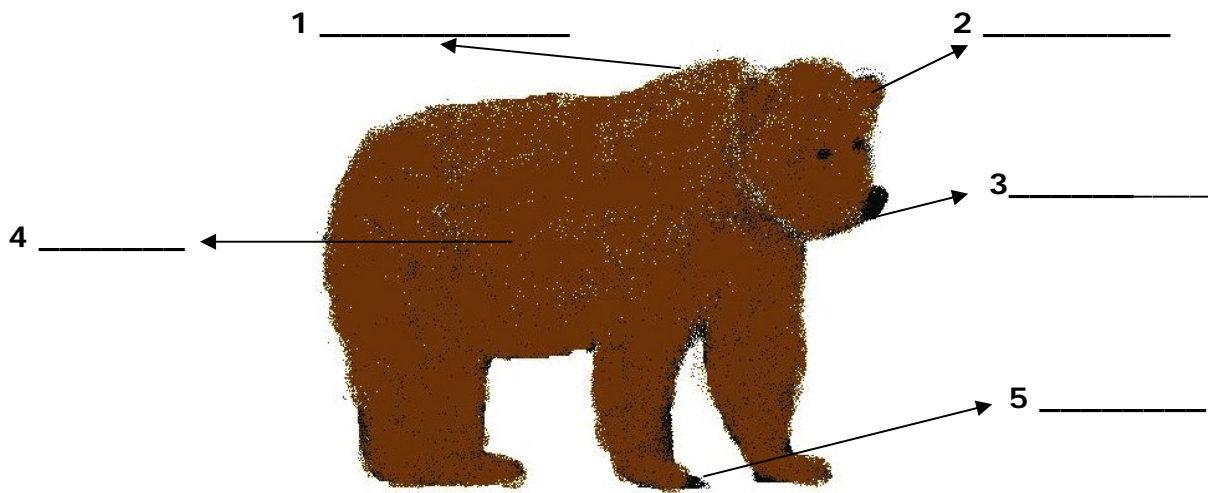

A quiz time:
